Dear Water Meter Customer:

As you are likely aware, the Village of Tarrytown is in the process of conducting a comprehensive replacement of residential and commercial water meters throughout the Village. If your household or business has had its water meter replaced within the past three months, this may be the first bill you will be receiving reflecting the measurement from your new meter.

You may see a difference between your last water bill and this one for the following reasons:

- 1) The new water meters are more accurate, and provide detailed measurement of usage down to the cubic foot rather than a rounded figure.
- 2) If your previous water meter had failed, and the Village had to rely on estimated water usage, the new meter will be reading your actual usage which may be lower or higher than the estimates.
- 3) For those with compounded meters who used to receive two different bills, you will now be receiving a single bill reflecting higher usage as the bills are now combined.

If you have any further questions or concerns, you may contact the Tarrytown Water Billing Department at (914) 631- 7875.

Kind regards,

Antoinette Morales
Village Treasurer
