VILLAGE OF TARRYTOWN BOARD OF TRUSTEES WORK SESSION 6:30 P.M. WEDNESDAY, MARCH 29, 2017 Tarrytown Village Hall One Depot Plaza, Tarrytown, New York

Board of Trustees Concerns

Open Session

- 1. Filming Fees
- 2. Kayak Launch
- 3. Parking Lot Wilson Park at Tower Hill Road
- 4. Handicapped Parking Wildey Street
- 5. Route 119 Bike/Pedestrian Study
- 6. Scheduling of Budget Meetings

Executive Session

- 1A. Tax Certiorari
- 2A. Tarrytown Boat Club Lease Amendment

March 13, 2017

Members of the Village of Tarrytown Board of Trustees:

We, the merchants of Tarrytown, write to encourage you to re-examine the Village Code on Filming and its required fees to conduct filming in the Village.

We are proposing that the Village secure higher fees for the right to film here. We believe that the privilege is currently granted at a rate lower than what is required in other Westchester towns and villages, as researched by Michael Blau. The increase in fees would certainly be beneficial for our community as half of these funds are set aside for improvements to the business district.

We would propose the following new rates for your consideration:

<u>Public Property Filming and Parking:</u> \$2500 for the first day, \$2000 each day thereafter (currently \$1500 for the first day and \$1000 each day thereafter)

Private Property Filming with Public Parking: \$1500 for the first day and \$1000 each day thereafter

<u>Private Property Filming, Parking Off-Site:</u> The fees remain the same. Could we make sure that this listing (along with the stipulation concerning Non-Profits and Students) be posted with the other Village Fees?

We appreciate your timely review of this matter.

Sincerely yours,

Theresa L. McCarthy
Merchants' Council Chair, Village of Tarrytown

To: Mike Blau

Subject: Handicap Parking-Shiloh Baptist Church

The congregants of the Shiloh Baptist Church on Wildey St have requested a change in the hours parking is restricted for the existing handicapped parking space.

Staff has reviewed this request and found it to be reasonable and necessary and therefore recommends its approval. Please bring this code change to the attention of the Board of Trustees for their consideration.

Thank you.

TARRYTOWN POLICE DEPARTMENT OFFICE MEMORANDUM

DATE:

February 22, 2017

FROM:

Lt. Barbelet

70.

Chief Brown

SUBJECT:

Code Change: Adjust restrictive parking times on a handicap spot

The Village has received a request to adjust the restrictive hours on a handicap parking spot located in front of the Shiloh Baptist Church on Wildey Street. The request comes on the behalf of a member of the congregation who states that the time adjustment better fits the need of the parishioners and pastor who utilize this spot on Sundays.

Currently the code reads as follows:

Name of Street or Lot

Side

Number of spaces; Location

Wildey St

South

from a point 60 feet east of

Washington Street for a distance of 20 feet, between (10:00am and

1:30pm), Sundays only

The request is to change a portion of the section under Number of spaces, which is in parenthesis/bold and to have it replaced by the following: "8:00am to 6:00pm". Thank you.

To: Mike Blau

Subject: RE: Rt. 119 bike/ped study

Hi Mike.

My goal here is to get a grant to cover the cost (for a Planning Consultant to prepare a study). With that I think the role of each municipality would be to contribute in the process of selecting a consultant to carry out the study, and generally working with the Consultant to assist in the study so that the results are most tailored to each municipality. I envision a working committee which could include a municipal official/board member/citizen or two from each municipality to meet with the consultant a few times throughout the duration of the study. Perhaps host one meeting to the public as a workshop also, to contribute to the study.

Thank you, Garrett

Subject: Rt. 119 bike/ped study

Hi Mike,

Would the Village of Tarrytown have interest in jointly working on a Rt. 119 bike/pedestrian study with the Town of Greenburgh, City of White Plains and Village of Elmsford?

Thank you,

Garrett Duquesne, AICP

Route 119 Complete Street Design Plan

March 20, 2017 [added 9W data, revised time line]

Background

New Bridge, New Opportunities

The New NY Bridge will have a beautiful "Shared Use Path" for people on foot and riding bikes, once the bridge is completed in 2018. It will be a magnet for local and regional recreational users, as well as opening up new transportation options. Route 9W sees 3,000 – 5,000 cyclists (mostly from NYC) each weekend day, the bridge will bring many of them into our towns. These new possibilities present significant economic opportunities for residents and business along the Route 119 corridor.

The crossing's expansion will also induce new motor vehicle trips. Local communities can take measures to minimize the number of people driving and the safety ramifications thereof.

To both of those ends, the Bridge project has a Community Benefits Program (CBP) that is issuing grants for local improvements.

The Promise and Perils of Route 119

Route 119 is the only direct, (mostly) level road linking the Tappan Zee Bridge and Tarrytown to White Plains. All other streets are very hilly and circuitous. Along this road are an array of both large and small retail establishments, offices, residential neighborhoods, schools, parks, libraries, bus stops, plus the downtowns of the Village of Elmsford and the City of White Plains. This highway also links the Bridge, the Old Croton Aqueduct State Park, the North/South County Trailway and the Bronx River Trailway.

Despite these tremendous reasons to walk and bike along Route 119, few people do. Many places lack sidewalks, even places where there are bus stops. Most of the pedestrian crossings are very long due to roadway widths and exacerbated by intersecting streets and highway ramps that meet at oblique angles. Then there's the lack of shoulders and speeds at which people drive.

Fixing the shortcomings will generate tourist income by making several new loop rides possible for bikers in NYC, Bergen, Westchester and Rockland. A safe cycle track on Route 119 would connect the three trails mentioned above. Crossing the new bridge path also leads to Route 9W, a very popular ride with affluent cyclists.

Walking and biking creates cohesion of residents to local businesses. Shopping becomes a means of

friendly interaction with neighbors. When people are on foot or bike, they tend to shop in the local business district; unlike when people get in cars, there's little difference between shopping around the corner and going somewhere else.

Normal cyclists will be able to ride to work in downtown White Plains from Nyack, Tarrytown, Elmsford and Greenburgh. Major health and safety benefits will be gained as well.

Big Win

The CBP is *very* interested in funding the Route 119 Complete Street Design Plan (the Plan). So much so that in 2015 the Bridge team directly hired consultants to perform a preliminary study along those lines. That preliminary study is a good start, examining four alternatives between Route 9 and Route 9A.

The Plan we are proposing here would extend the study into downtown White Plains, consider "quick build" alternatives, have a robust community involvement process, including demonstration projects. The goal would be finding consensus on how to make Route 119 usable by everyone - trucks, people walking, riding bikes and buses, and in cars.

This Plan would also tie in nicely with the Route 9 Active Transportation Conceptual Design Plan, a similar study the CBP is funding to improve cycling and walking on Route 9 in Hastings-on-Hudson through Sleepy Hollow.

NYBC's Tasks

Grant Writing

- Obtain preliminary approval from the four municipalities to proceed
- Write and submit the "Letter of Interest" to the CBP
- Draft a resolution for the municipalities supporting the grant application

- The resolutions should reference a Steering Committee to which each municipality will appoint 3 people. Even better, the resolution will name those 3 people.
- If the CBP responds positively...
- Follow up on resolution adoption, attend board meetings if requested
- Write and submit the full grant application to the CBP

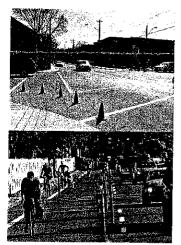

Project Management

- Meet with Steering Committee
- With input from the Steering Committee, draft and issue an RFP for a consultant to perform public outreach, design and engineering services
- Review proposals and pick vendor in consultation with Steering Committee
- Oversee consultant's work

Expected Plan Deliverables

The RFP will provide consultants a fixed fee. They will compete on the scope of services to be offered for that price and their experience. The Plan process will look something like this:

- Gathering existing conditions, travel patterns and data
- Public workshops and/or walking audits to learn of specific concerns
- Development of possible solutions, analyzing relative benefits and disadvantages
- Public workshops to review possible solutions
- Demonstration projects, so people can see and feel how the proposals will work
- Draft of the Conceptual Design Plan
- Final report

Tight Time Line

The CBP's reimbursement process will be shut in June 2018, so time is of the essence. Fortunately, the application process is quick and painless. (The Route 9 project was approved within a week of being submitted.) This means NYBC and the municipalities must move quickly. Here is a possible time line:

Late March 2017: submit preliminary Letter of Interest to CBP

Mid April 2017: obtain resolutions supporting grant, name Steering Committee members

Early May 2017: submit full application to CBP

Mid May 2017: receive grant approval

Late May 2017: issue RFP

Late June 2017: review proposals, select vendor

Early July 2017: vendor starts work May 2018: receive Final Report

Budget

The CBP grant would pay for the Plan itself. No matching funds are required. The application would be for a \$250,000 grant to cover the cost of producing the Plan and project management.

The grant writing process will cost \$120/hr, which the four municipalities can split amongst themselves. Assuming each entity moves at a reasonable speed and doesn't need our attendance at meetings, the whole process will likely take around 20 hours.

		** The management of the state
